

By Structural Integrity Associates, Inc.

THE LEADER IN PRODUCT CERTIFICATION FOR EXTREME LOADING

SPECIALIZING IN SEISMIC, WIND & PHYSICAL SECURITY

TRU COMPLIANCE PRODUCT CERTIFICATION AGENCY

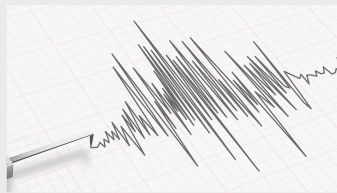

Based in Bend, Oregon, **TRU Compliance** is the product certification agency of Structural Integrity Associates, Inc. and a recognized leader in **Seismic, Wind & Physical Security** product certification since 2008. We offer a full service product certification agency, executing project specific and product line approvals for a range of code requirements.

The TRU Compliance product certification agency provides customized, turn-key product certification programs tailored to meet our clients' unique needs. Our engineering staff has extensive experience in code development, project execution and peer review. Certification programs are founded on technically defensible approaches which satisfy the most stringent requirements and building official reviews.

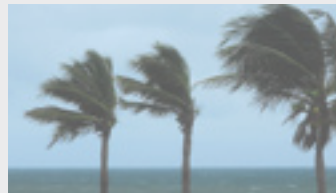

With over 25,000 individual product certifications to date, we know what it takes to effectively execute projects and achieve compliance from beginning to end.

The mark that owners and reviewing agencies trust, TRU Compliance brings together multi-jurisdiction certification and factory inspection to bring the highest standard of extreme event compliance.

Seismic testing and certification of mechanical, electrical, and architectural components and their supports for IBC and OSHPD requirements along with IEEE, ASHRAE, and nuclear standards

Wind certification for mechanical, electrical, and architectural components in compliance with Florida Building Code and others. Miami-Dade NOA and missile impact testing available

Testing and certification for forced entry, blast, ballistics, and vehicle impact in accordance with all major standards and government criteria
